EDUCATION

- Nanjing University** 2024–2028 (Expected)
School of Mathematics · B.Sc. in Information and Computational Science Nanjing, China
 - GPA: **4.45/5.0**; Major Rank: **1/15**.
 - Core Coursework: Mathematical Analysis (85), Advanced Algebra (92), Analytic Geometry (99), Numerical Analysis (91), and Discrete Mathematics (95).
 - English Proficiency: CET-4 627; CET-6 508.

RESEARCH INTERESTS

My research interests include Optimization Theory, Natural Language Processing (NLP), and Large Language Models (LLMs), with a focus on the connections among mathematical theory, model implementation, and training dynamics.

HONORS AND AWARDS

- Second Prize** · National College Students Mathematics Competition (Jiangsu Division) 2025
- Third Prize** · China Undergraduate Mathematical Contest in Modeling (Jiangsu Division) 2025
- Second Prize** · Nanjing University People's Scholarship (Top 20%) 2025

PROJECTS

- min-GPT: A From-Scratch Conversational GPT** 2026.08
Independent Developer | PyTorch · GPT-2 · DailyDialog · W&B [🔗]
 - Implemented a GPT-2 byte-level BPE tokenizer, Causal Self-Attention, MLP, and Pre-LN decoder-only Transformer from scratch in PyTorch, then loaded pretrained DialoGPT-small weights.
 - Performed full-parameter fine-tuning on DailyDialog with reply-only loss, reducing test-set perplexity from **42.34** to **14.28**.

TECHNICAL SKILLS

Languages	Python, C++
Frameworks	PyTorch
Tools	LaTeX, Git, Weights & Biases (W&B)
